

Advanced Restorative Care

Clinician: Dr April Whitlock

We welcome your referrals for patients needing advanced restorative care.

Some patients will require advanced restorative care. We are able to undertake occlusal rehabilitation, comprehensive smile makeovers and provide advice and help in the development of complex treatment planning.

Dr April Whitlock

ADVANCED RESTORATIVE CARE

Prior to dentistry, my formative experience in molecular ecology research at the University of Sheffield (2003) fostered a mindset for meticulous and precise work and the importance of good protocol. This background and a desire for a hands-on clinical career, led to my qualification in dentistry from the University of Liverpool in 2010.

In my early years, I gained a breadth of experience in all disciplines in general dentistry, while balancing the responsibilities of raising a young family. With numerous and ongoing CPD courses, my education journey gradually pivoted towards aesthetic restorative dentistry. In 2019, I became a full member of the British Academy of Cosmetic Dentistry and in 2022 fulfilled a Postgraduate Diploma in Advanced Aesthetic Dentistry.

I am executing a wide range of aesthetic and functional adhesive restorative cases utilising a variety of different treatment modalities such as injection moulding, Smilefast and Invisalign within a fully digital or hybrid analogue workflow. Every case is documented from smile design to finish with clinical photography to facilitate reflection and learning.

In order to carry out comprehensive cases, I have undertaken many courses in occlusion and TMD, and am now involved in multidisciplinary treatment planning in collaboration with the specialists in our practice. Colleagues seeking a trusted partner to provide aesthetic treatment can rely on Dr. April's attention to detail, innovative and caring approach and commitment to achieve exceptional outcomes for patients.

TREATMENT COSTS

Consultation	£60
